

# TW-01 GROUP VERSION

---

CLARUSWAY  
WAY TO REINVENT YOURSELF

## Meeting Agenda

---

- ▶ Icebreaking
- ▶ Questions
- ▶ Interview Questions
- ▶ Coffee Break
- ▶ Coding Challenge
- ▶ Video of the week
- ▶ Retro meeting
- ▶ Case study / project

# Teamwork Schedule

---

## Ice-breaking

10m

- Personal Questions (Study Environment, Kids etc.)
- Any challenges (Classes, Coding, studying, etc.)
- Ask how they're studying, give personal advice.
- Remind that practice makes perfect.

## Ask Questions

15m

### 1. What do we mean by COMPUTATIONAL THINKING?

- A. Breaking a task into smaller tasks.
- ☒ B. Understanding a complex problem and developing possible solutions.
- C. Focusing on what is important, ignoring what is unnecessary.
- D. Selecting a computer to use.

### 2. Breaking a complex problem down into smaller problems and solving each one individually.

- A. Programming
- ☒ B. Decomposition
- C. Abstraction
- D. Algorithmic Thinking

### 3. Why do we need to think computationally?

- A. To help us to think like a computer
- B. To help us program
- ☒ C. To help us solve complex problems more easily
- D. None of these

### 4. What is an Algorithm?

- A. Some instructions
- B. Something a computer does to think
- C. A series of steps and instructions with given outputs to produce an input
- ☒ D. A series of steps and instructions with given inputs to produce an output

**5. Identify the command which is used to remove files?**

- A. delete
- ☒ B. rm
- C. dm
- D. remove

**6. What is the core of the Linux operating system?**

- A. Terminal
- ☒ B. Kernel
- C. Command
- D. Bash

**7. Identify the OS which is not based on Linux?**

- ☒ A. BSD
- B. CentOS
- C. Ubuntu
- D. Red Hat

**8. Which symbol is used to represent a decision in a systems flowchart?**

- A. Rectangle
- B. Diamond
- ☒ C. Parallelogram
- D. Square

**9. What is the correct order of occurrence in a system flowchart?**

- A. input, output, process, feedback
- B. feedback, input, output, process
- ☒ C. input, process, output, feedback
- D. input, output, process

**10. What does the Start/End symbol do?**

- A. Ends the program Only
- ☒ B. Can be used to show the beginning or ending of a program.
- C. Visual representation of the entire program
- D. Starts the program Only

---

## Interview Questions

**15m**

### 1. What does computational thinking stand for?

Computational thinking is an interrelated set of skills and practices for solving complex problems.

### 2. Why is computational thinking important?

It is important because it enables real-world problem solving.

### 3. What is Linux?

Linux is an open source operating system.

### 4. If you have saved a file in Linux. Later you wish to rename that file, what command is designed for it?

mv command stands for renaming files in linux terminal

### 5. What is CLI?

CLI is a command line program that accepts text input to execute operating system functions.  
CLI stands for command line interface.

---

---

## Coffee Break

**10m**

---

---

## Video of the Week

**10m**

- Coding is Not Difficult

## Coding Challenge

**15m**

Place the instructions below in the flow chart. *Some of the instructions are not required - you should only include those which are relevant to the task.*

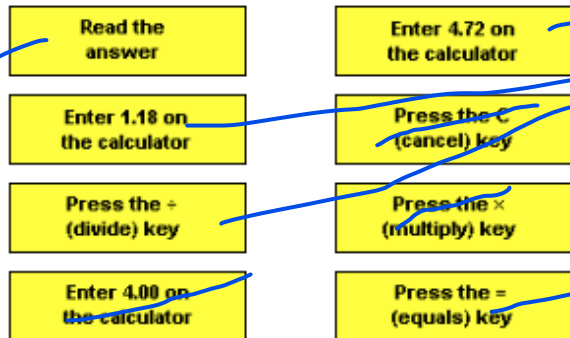

## Q1. Steps for working out 4.72 divided by 1.18 on a calculator.

### Question 1

The flow chart on the right is meant to show the steps for working out 4.72 divided by 1.18 on a calculator.

Place the instructions below in the flow chart.

Some of the instructions are not required - you should only include those which are relevant to the task.

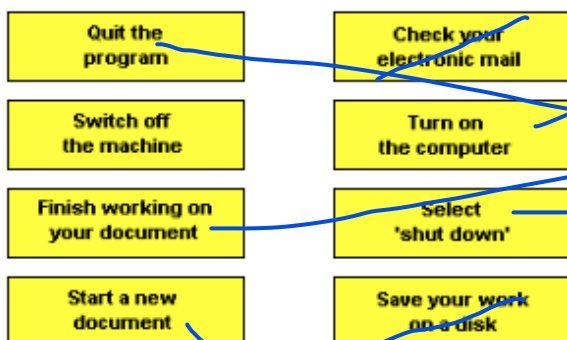

## Q2. Steps for stopping working on a computer and shutting it down..

### Question 2

The flow chart on the right is meant to show the steps for stopping working on a computer and shutting it down.

Place the instructions below in the flow chart.

Some of the instructions are not required - you should only include those which are relevant to the task.

## Retro Meeting on a personal and team level

**10m**

Ask the questions below:

- What went well?
- What could be improved?
- What will we commit to do better in the next week?

## Case study/Project

**15m**

Linux-CC-01 : Linux Operations

---

## Closing

**5m**

-Next week's plan

-QA Session

---
